

# Building Project Update

August 2018

On June 12th, the Library's Board of Trustees moved to proceed with the goal of constructing a new library facility.

Since then, the Library has begun a search for Owner's Representation for the project to start with site selection and conclude with a new building in 3-5 years.

An architectural firm will be hired to conduct feasibility studies on a number of sites in and around town. A site will likely be determined in 2019. Site acquisition will follow.

Other activities over the next year will include exploring fundraising avenues in the community, and seeking other funding opportunities elsewhere.

Designing a new building will likely begin in 2020, and the community will be very much involved.

We are energized to embark on this exciting path towards a new, modern library for our community!
